PROFILE

Full stack engineer with 8+ years of software development experience. I build React interfaces and Node.js APIs backed by relational databases, and I support the services I ship on AWS. My work spans payment processing, real-time mobility applications and a booking platform for my family's business.

TECHNICAL SKILLS

Application development | TypeScript, JavaScript, React, Next.js, Node.js, REST APIs, Java, Spring Boot
Data | PostgreSQL, MySQL, Oracle, Redis, schema design, SQL query optimization
Cloud and delivery | AWS Lambda, API Gateway, EKS, SQS, SNS, Docker, Kubernetes, Terraform
Testing and CI/CD | Jest, Cypress, Playwright, GitHub Actions, Jenkins, Azure DevOps

EXPERIENCE

La Vieja Adventures | Independent Full-Stack Engineer

Apr 2026 - Present | Family business | laviejaadventures.com

- Built and operate a booking platform on AWS using TypeScript, React, Next.js, Spring Boot, GraphQL and MySQL. Own the architecture, integrations, deployment and production support.
- Automated reservation, payment and customer communication workflows, saving 60+ hours of manual processing per month.

EXQ2 / Midland Credit Management | Senior Cloud Software Engineer

Oct 2025 - Apr 2026

- Built React interfaces, Node.js and TypeScript REST APIs, and PostgreSQL queries for a payment-control platform. Integrated Java and Spring Boot services with payment workflows.
- Tuned SQL queries and used Terraform to support cloud deployments. Worked with 10+ engineers and stakeholders on design decisions, testing, releases and production troubleshooting.

Wind River | Senior Software Engineer

Sep 2024 - Oct 2025 | Remote

- Maintained microservices, including Node.js services, on AWS and Kubernetes. Together they handled approximately 6 million requests and events per day. Connected React interfaces to production APIs.
- Built event-driven integrations with Kafka, SQS and SNS. Automated CI/CD with GitHub Actions and Jenkins, cutting deployment time by 68%. Reviewed code and architecture and handled incidents.

Costa Rica Software Services | Full-Stack Engineer

Sep 2022 - Jun 2024

- Built reusable React components and integrated Node.js REST APIs for GPS tracking, payments and live ride updates on mobility platforms including Kaptyn. Tuned SQL queries and added caching.
- Raised automated test coverage to 86% with tools including Jest and Cypress.

Intel via Infosys | Software Engineer

Feb 2021 - May 2022

- Built React interfaces and internal APIs for a chemical-management platform. Integrated Node.js and Java services with Oracle data and resolved production issues across application layers.

MicroVention / Terumo | Software Development Engineer

2016 - Feb 2020

- Automated reporting and equipment monitoring across 100+ medical-device manufacturing processes, reducing manual effort by approximately 80%.

EDUCATION AND LANGUAGES

Bachelor's Degree in Computer Engineering | Instituto Tecnológico de Costa Rica | 2009 - 2014
Spanish (native) | English (B2, CEFR)
